New Hampshire Has Recovered Pre-Pandemic Levels of Private Sector Employment

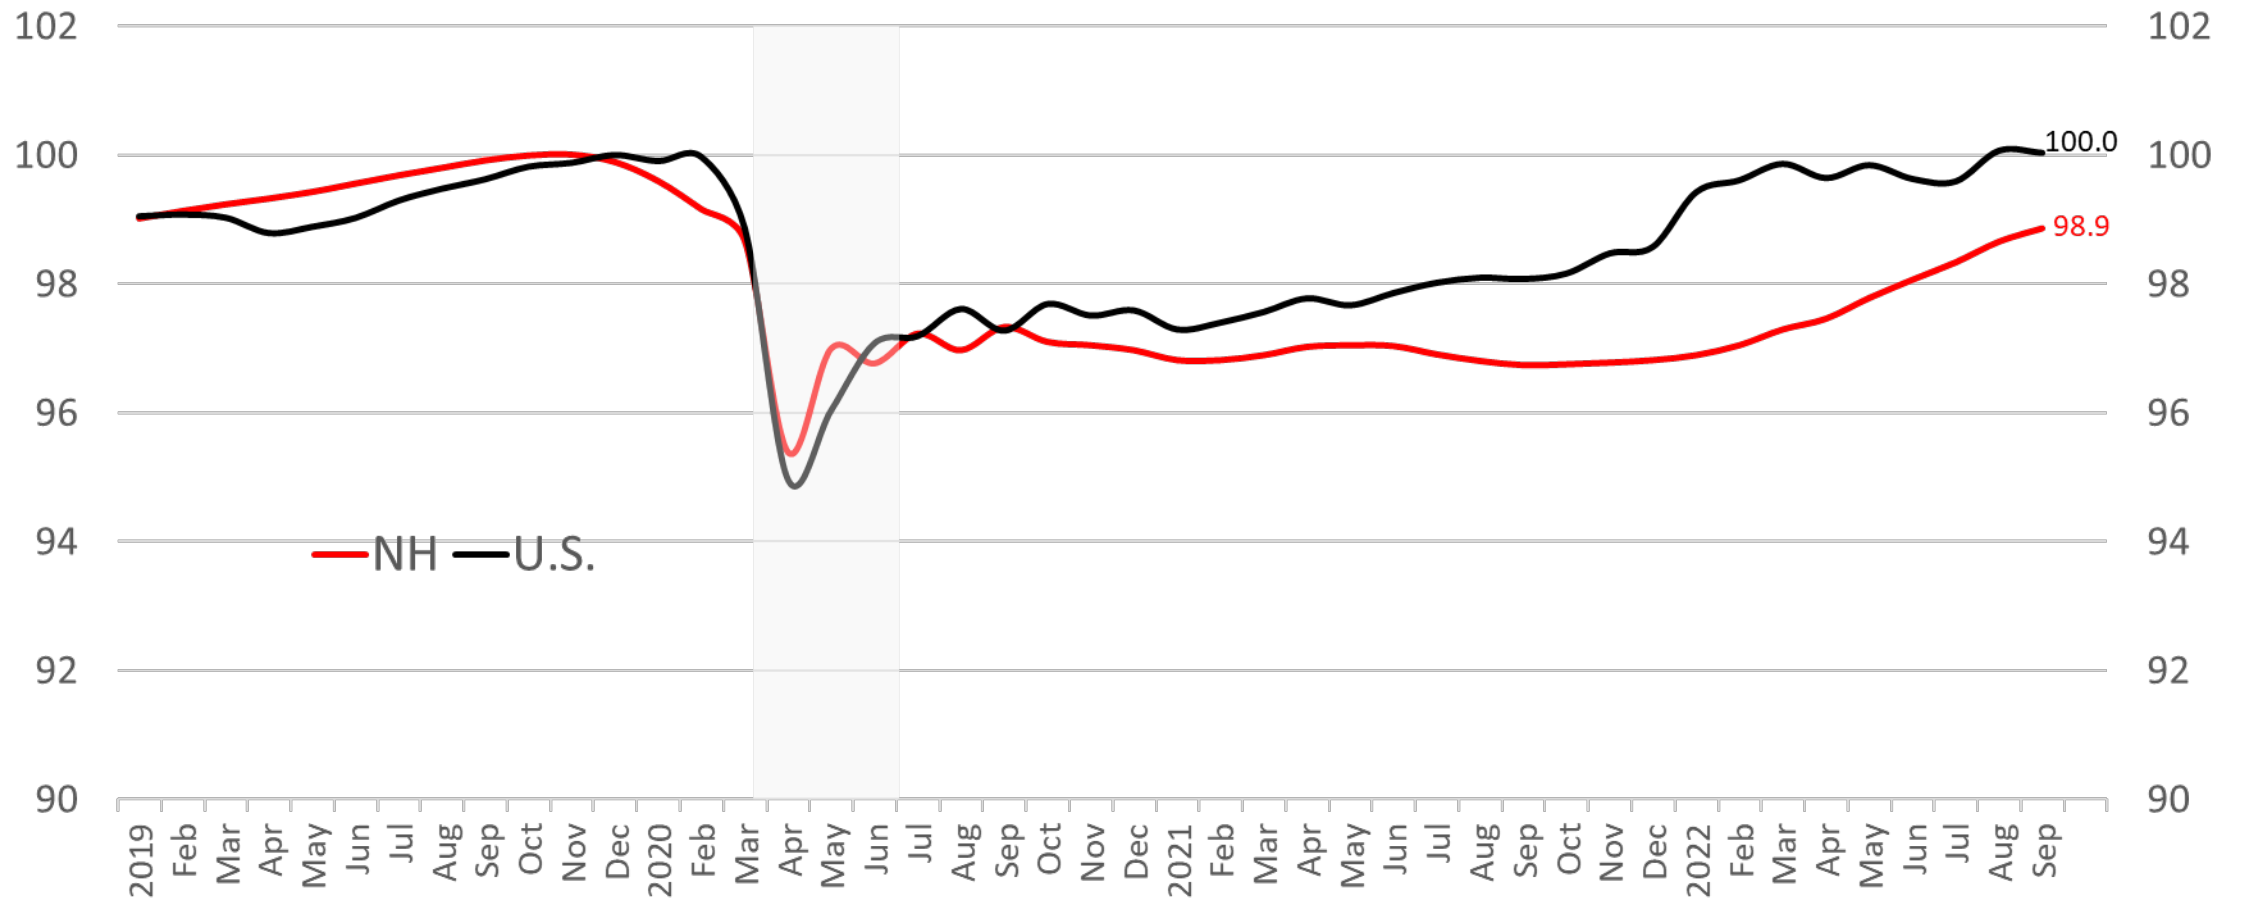

How Close Each State is to Recovering Pre-Covid Peak Level of Private Employment
Through September 2022

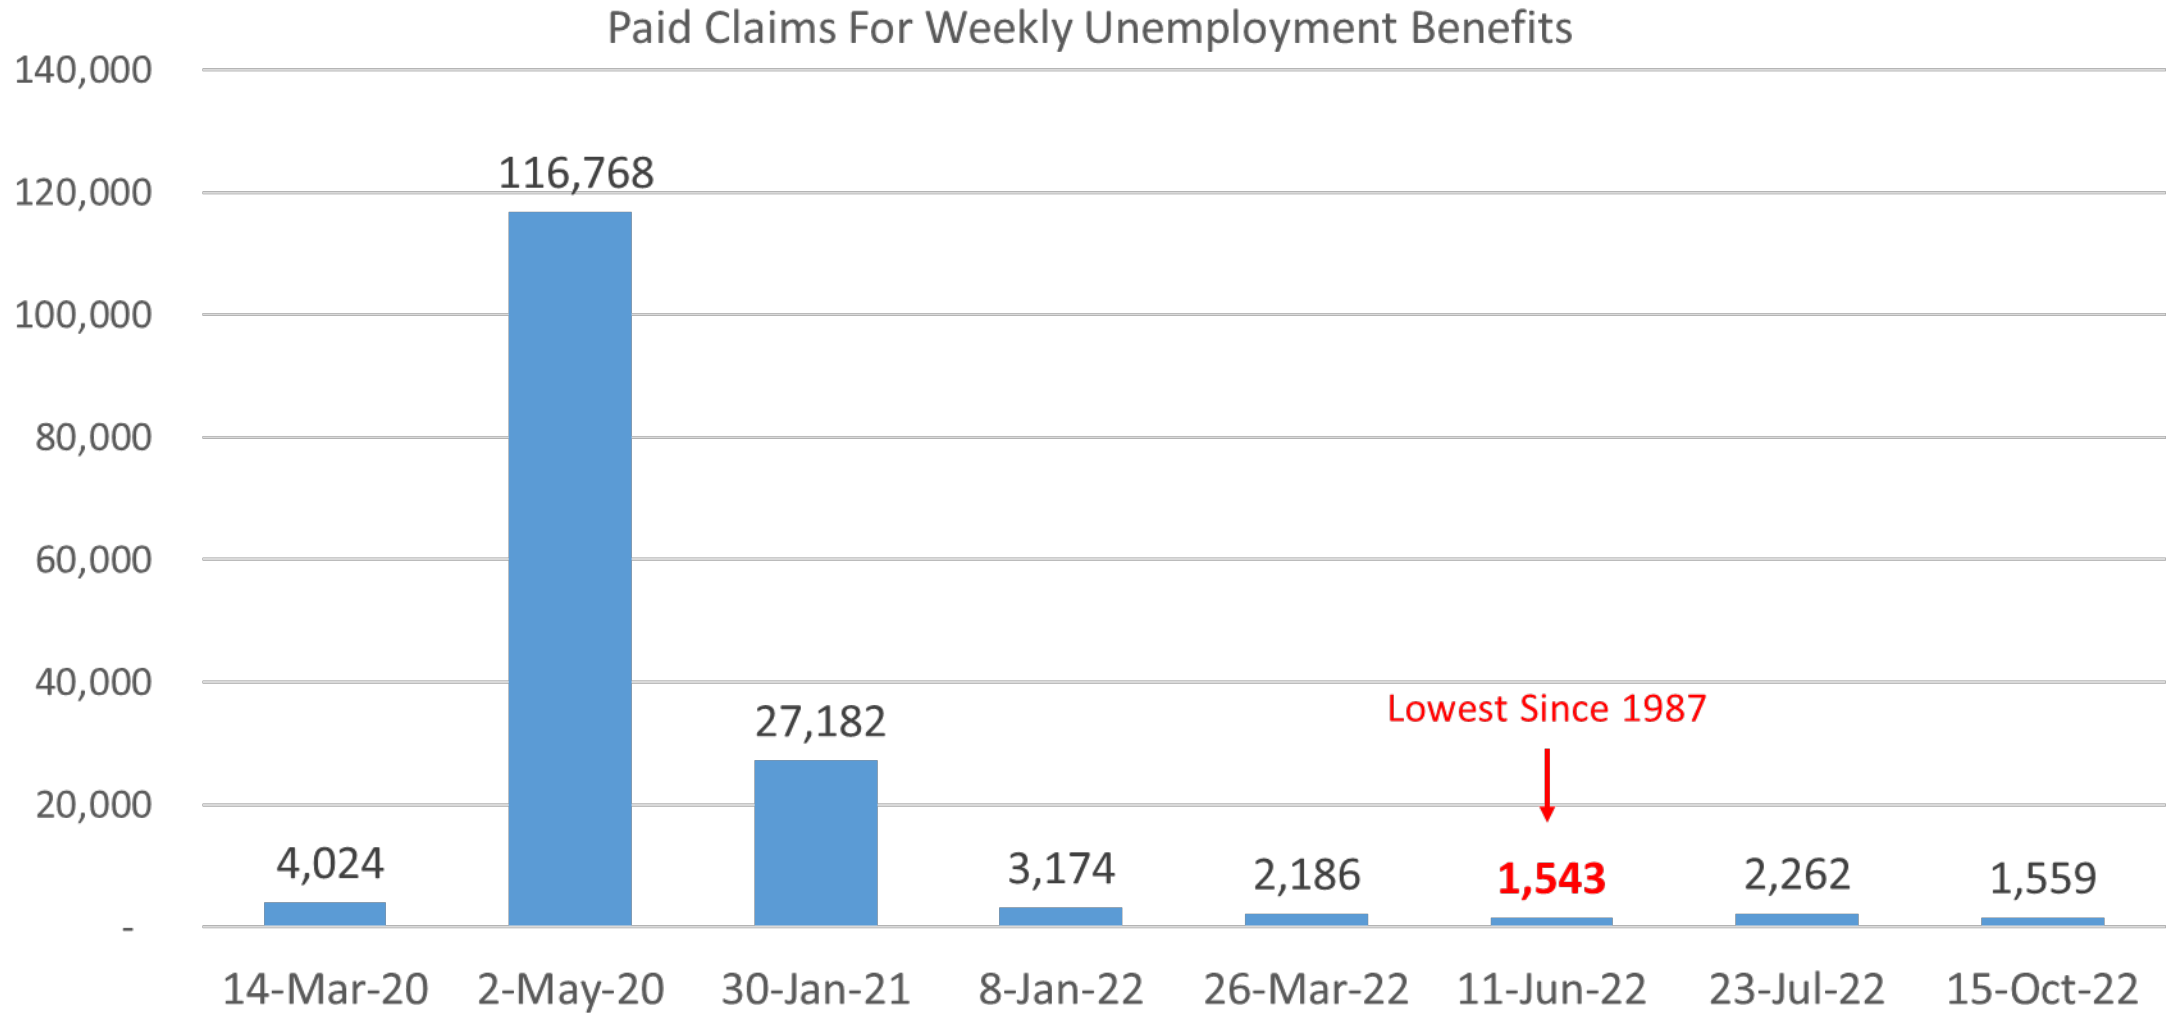

The Labor Force is Recovering

We are down 1.1% Compared to Pre-Pandemic Peak

Seasonally Adjusted Labor Force: Pre-Pandemic Peak = 100

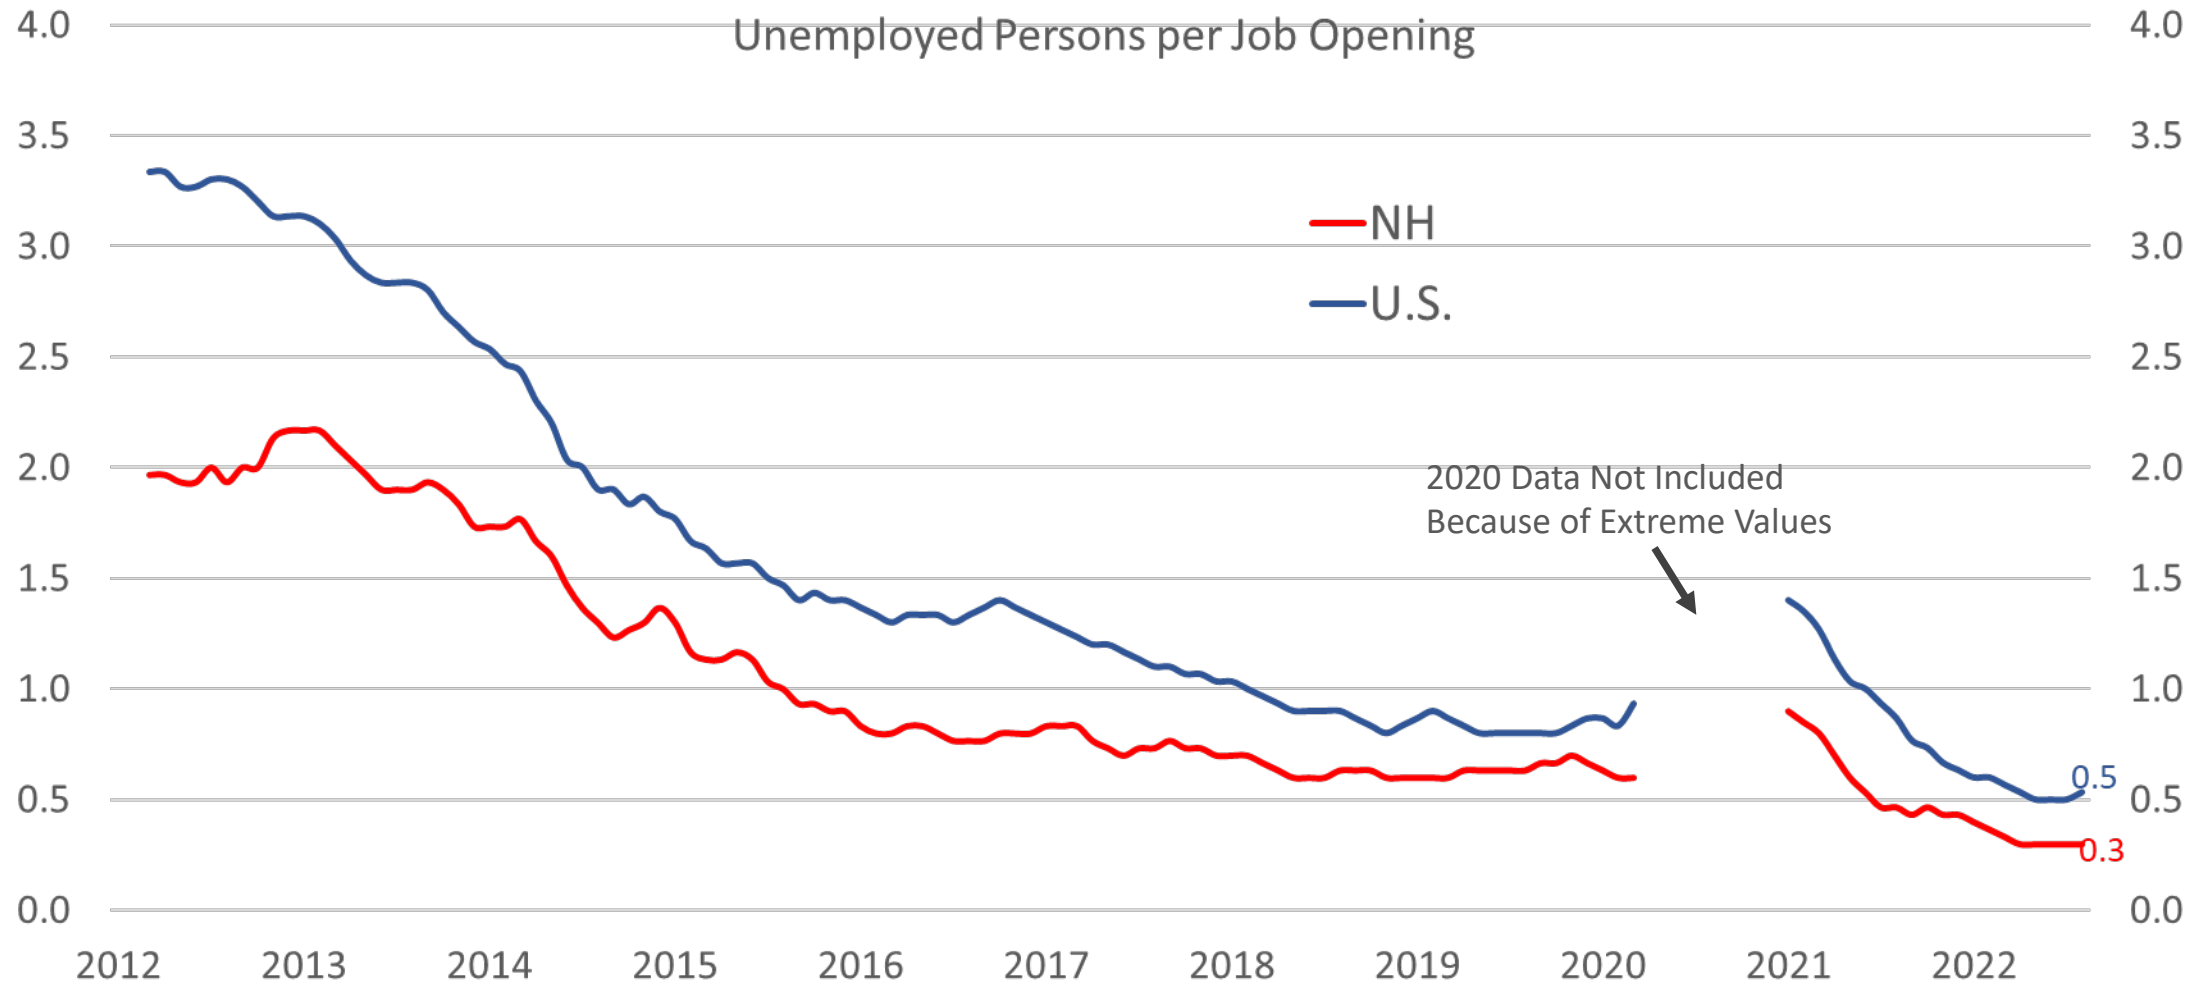

Unemployment Claims Are at Near Historic Lows

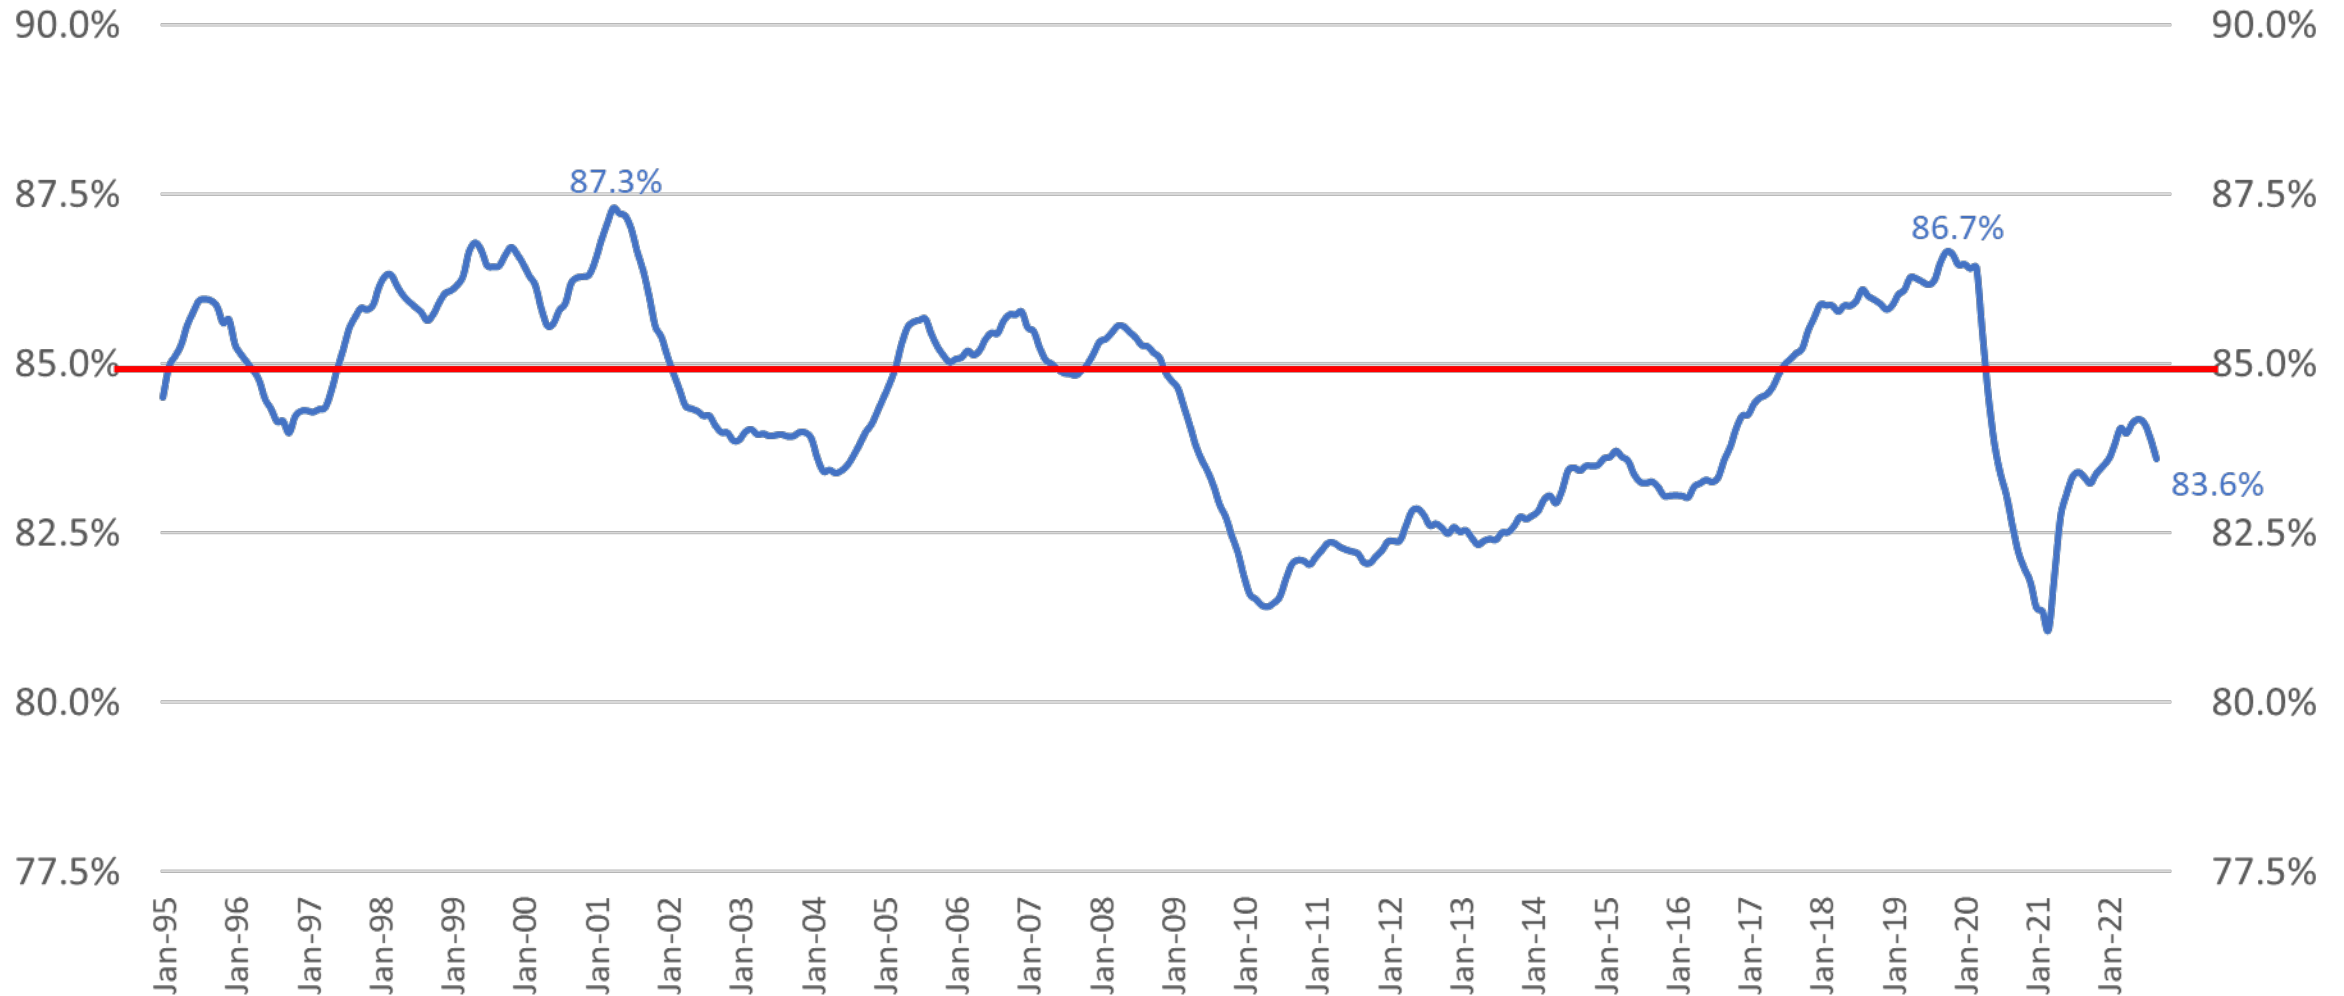

Source: NHES

Meeting Labor Needs Will Require Getting People Back Into the Labor Force – There Aren't Enough Unemployed to Close the Gap

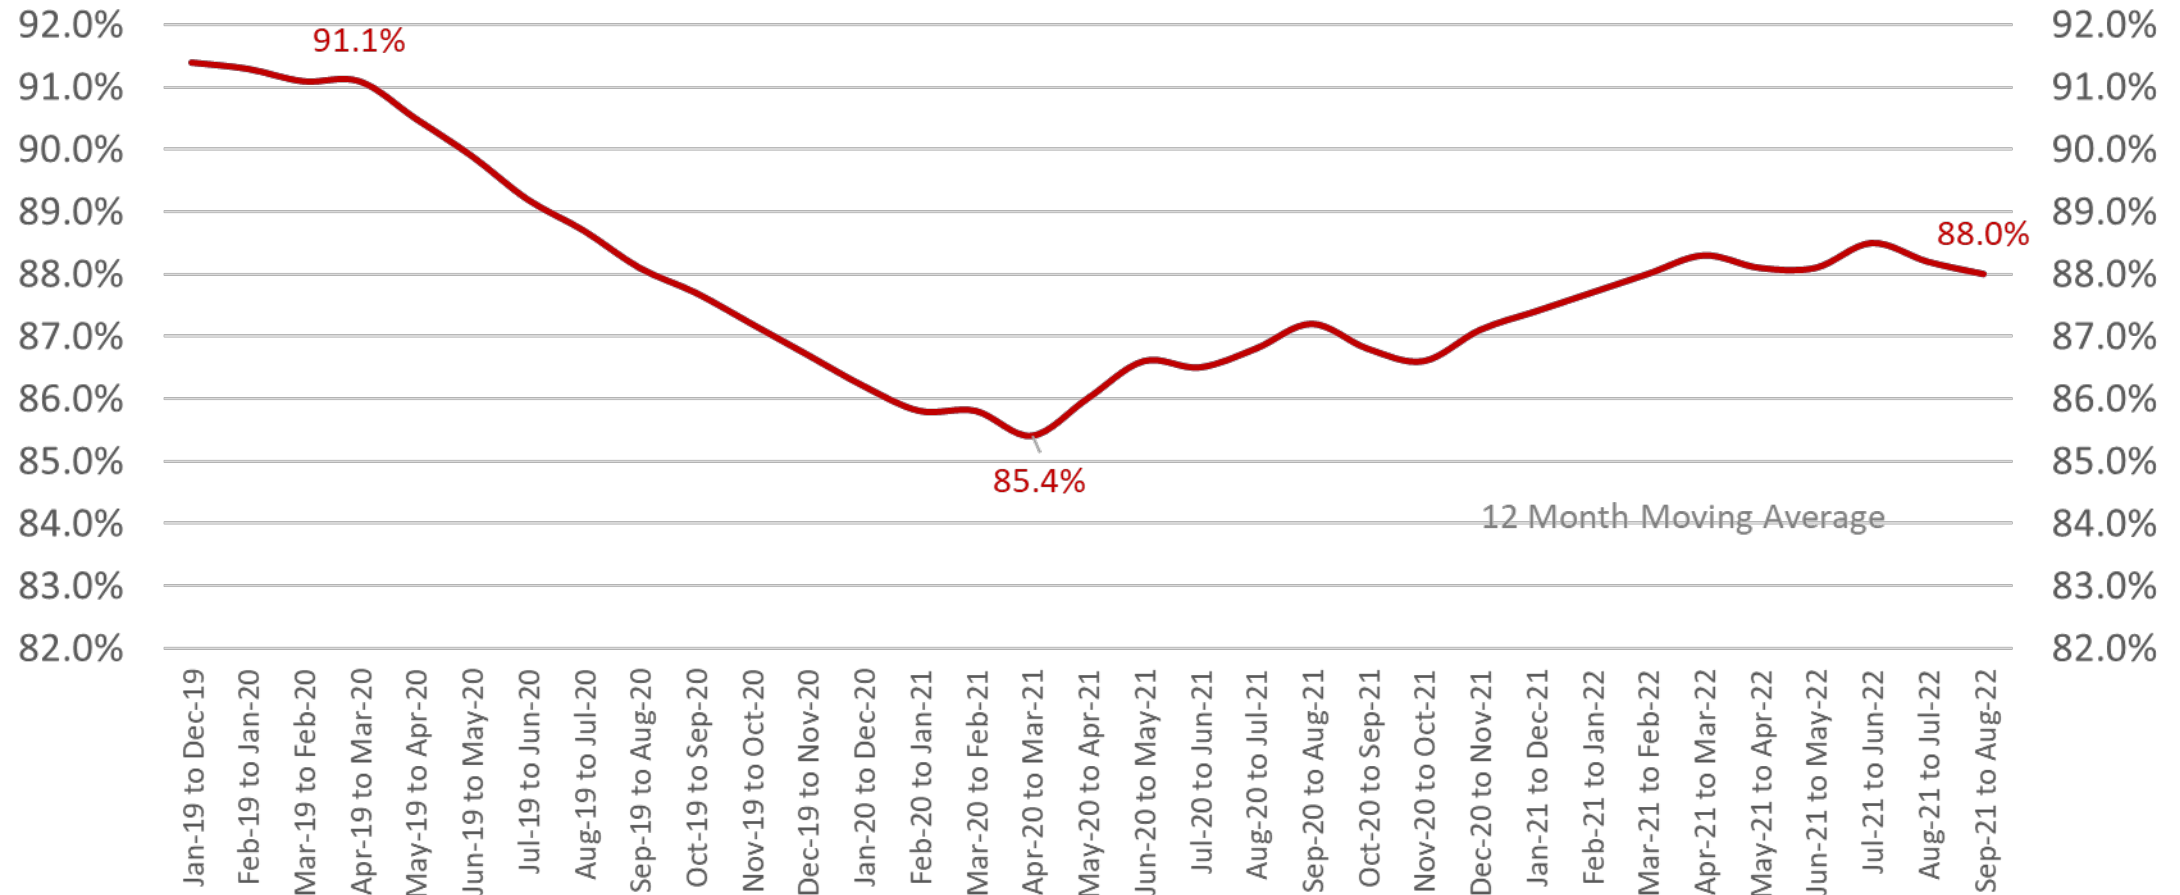

Employment Among the Prime-Age Labor Force Remains Below “Full Employment” – There is Still Room to Grow

NH Emp. to Population Ratio Thru September 2022 – Ages 25-54

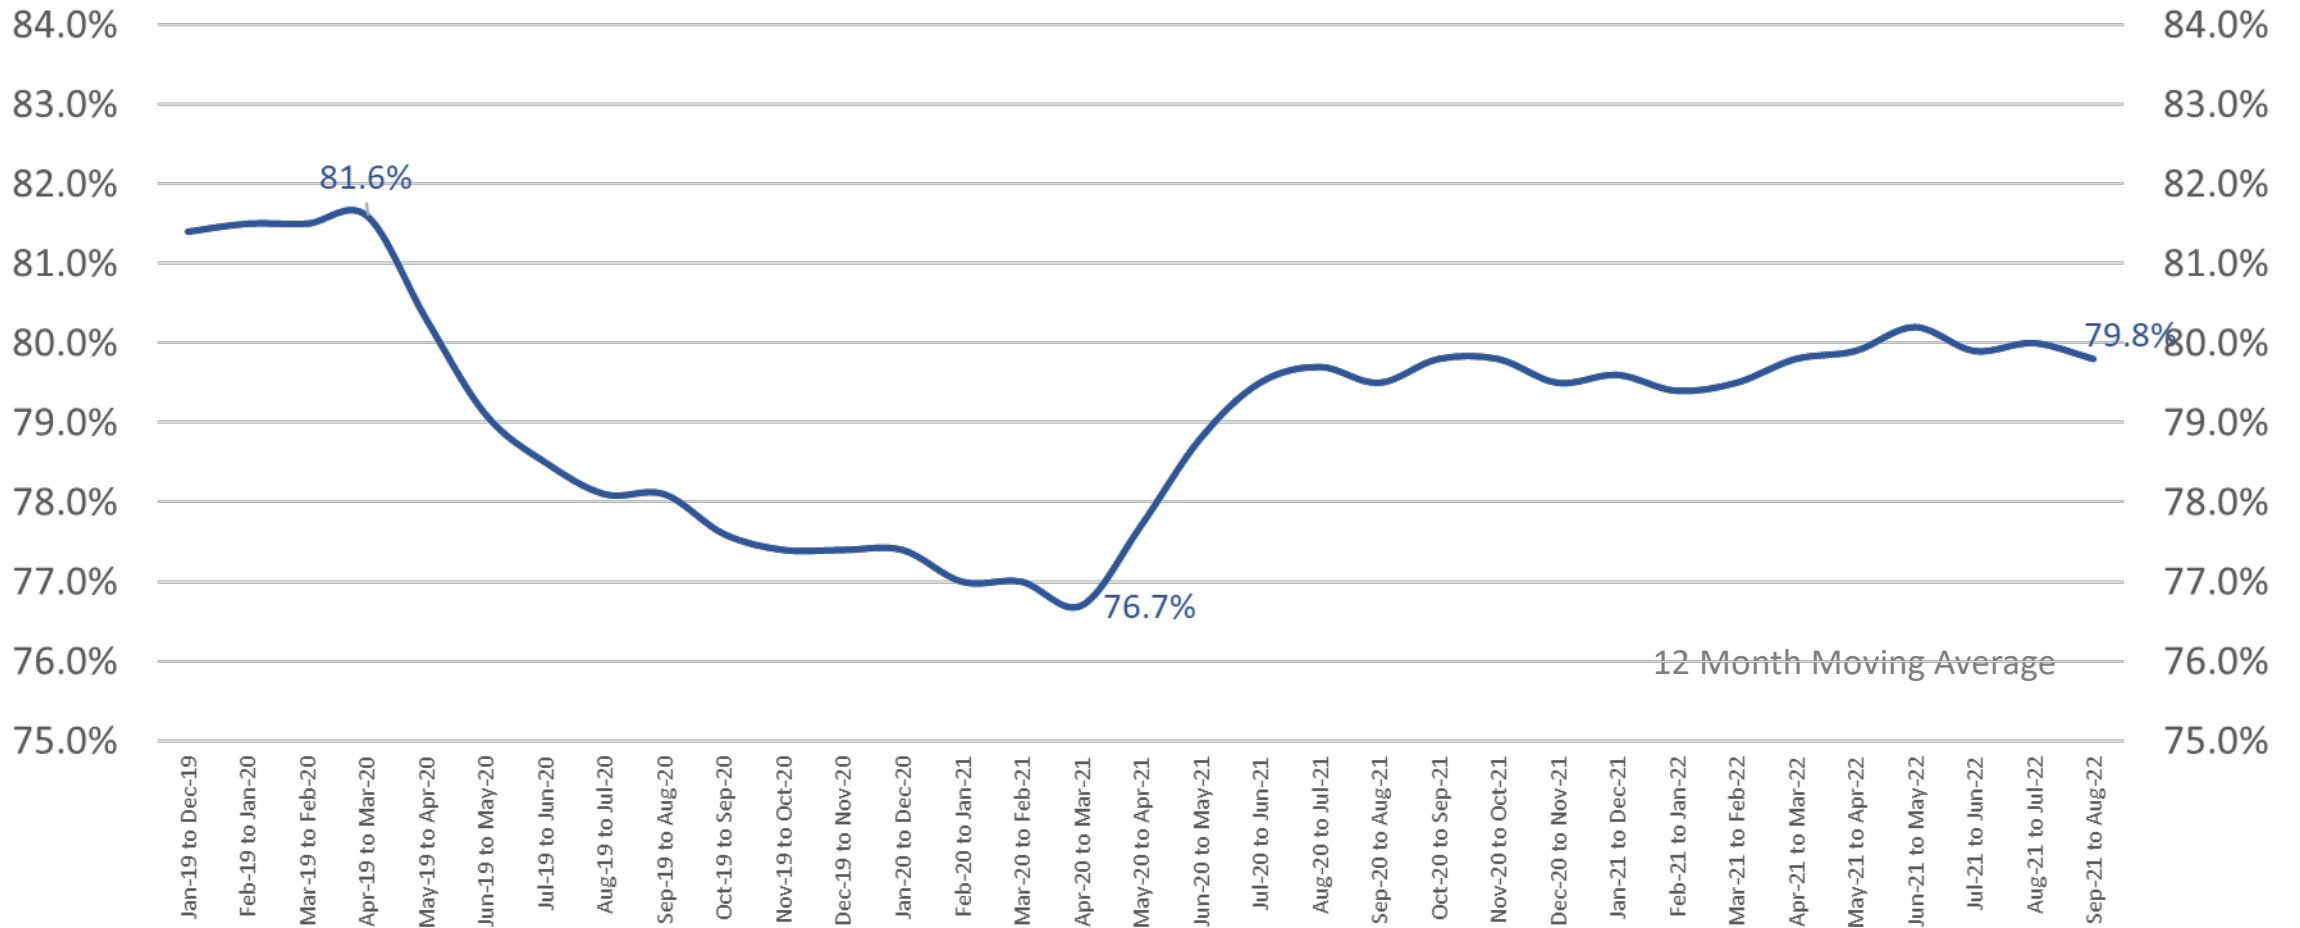

The Employment to Population Ratio Among “Prime Age” Male Workforce Remains Three (3) Percent Below Pre-Pandemic Peak

Employment to Population Ratio NH Males Ages 25 to 54

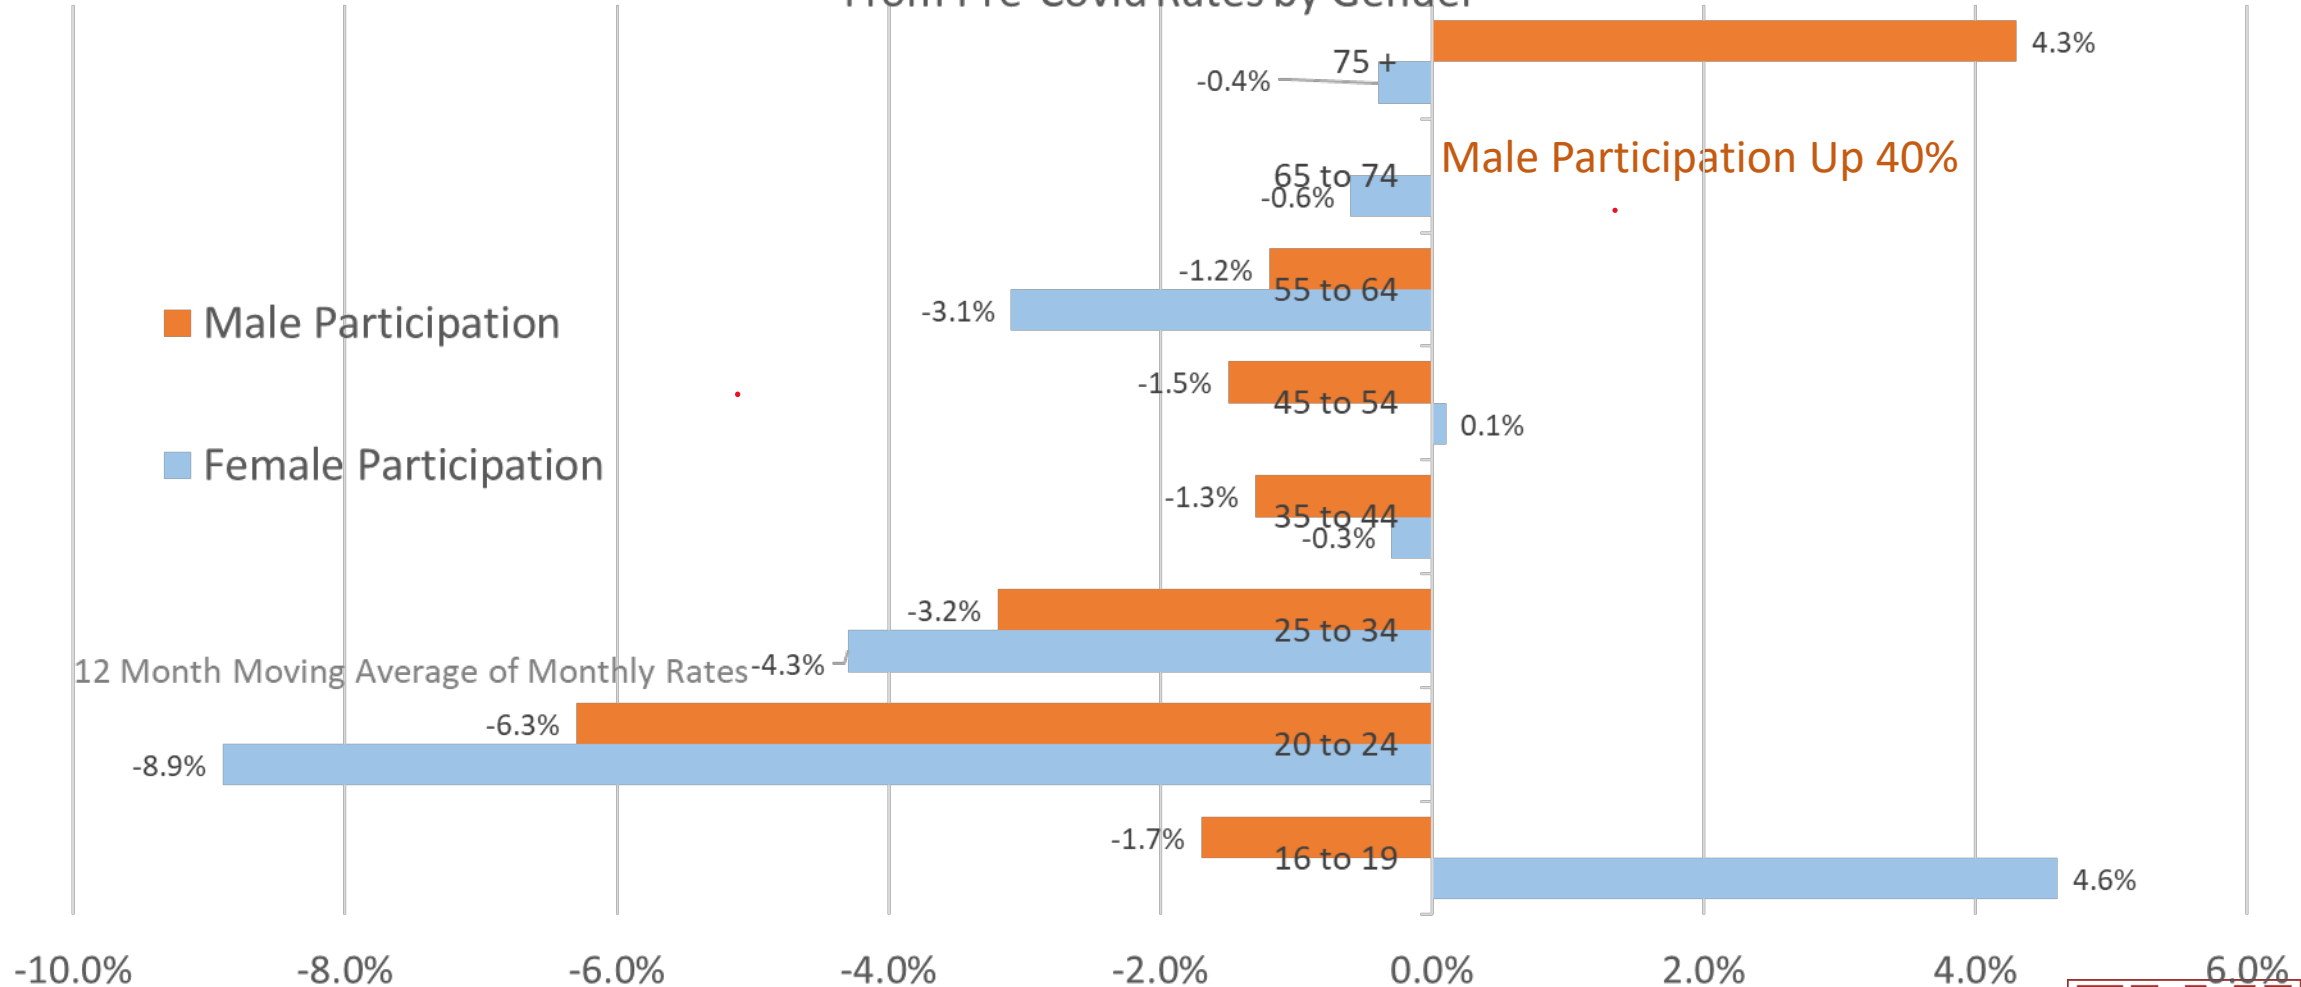

While “Prime Age” Female Employment to Population Ratio Remains Just 1.8 Percent Below Peak

Employment to Population Ratio NH Females Ages 25 to 54

Core (25-54) Labor Force Participation Has Fallen Furthest Among Prime Working- Age (25-54) Males, While Older Males Have Increased Participation. Participation Has Fallen the Most Among Females Who are Most Likely to Have Young Children

% Change in NH's Labor Force Participation From Pre-Covid Rates by Gender
